

30 April 2018

**CEM9 Side Event: Power System Transformation: Case Studies from Brazil, China, India and Mexico**

This side event will highlight different approaches to power system transformation (PST) in four key countries in the 21<sup>st</sup> Century Power Partnership (21CPP) network. It will serve to highlight actions that countries are taking to make their power systems cleaner, more secure and resilient, and available to increasing numbers of users.

Progress on PST is happening at different rates around the globe, with a variety of experiences gathered along the way. This side event will remind practitioners of the value of comparing and contrasting best practices and lessons learned.

**Time:** 10:30-11:30; 24 May 2018

**Location:** Danish Architecture Centre (DAC), Strandgade 27B, 1401 Copenhagen K., Room 1.

**Please register here:** <https://nordiccleanenergyweek.com/sessions/power-system-transformation-case-studies-from-brazil-china-india-and-mexico/>
